Prepared by Paul Jepsen, City of Maricopa - Copyright 2008

Notice

The construction of a new school facility is dependent on many factors. This map represents current and potential school sites as offered by developers during the planning and zoning process. Any potential site must fall within the needs of the district, be negotiated by district officials, and approved by the governing board.

This map is for informational purposes only - Identification of a site on this map in no way guarantees the construction of a school facility at that location.
